

EDUCATING THE INDUSTRY SINCE 1994

# SECURITISATION FUNDAMENTALS

## COURSE OVERVIEW

The ASF's Securitisation Fundamentals Program is a four-hour introductory course designed to provide an overview of key securitisation concepts. The course will equip participants with a foundation of how this market sector operates, its purpose and some of its challenges.

## COURSE OBJECTIVES

- ◆ understand how the securitisation market has developed
- ◆ understand key terminology and concepts of securitisation
- ◆ understand the roles played by industry participants (e.g. originators, rating agencies, trustees, swap providers, arrangers, investors and ancillary services providers such as auditors, lawyers, tax specialists, insurers)
- ◆ understand the benefits and risks of securitisation
- ◆ understand the securitisation process through case studies of real securitisation transactions
- ◆ network with other financial market professionals

## WHO SHOULD ATTEND

- ◆ those looking to develop an understanding of securitisation (without necessarily working as securitisation practitioners or in the securitisation sector)
- ◆ any other market professionals
